

ABSTRACTA NACELLE ASSEMBLY FOR A GAS TURBINE ENGINE

5 A nacelle assembly 40 adapted for mounting on a ducted fan
gas turbine engine 20 comprising a generally annular body 46
having an air inlet 42 and an air outlet 44, the generally
annular body 46 encircling a region of the engine 20 when
working in operative association with the engine 20 and has a
10 first attachment means 48 to a rigid member 58 and a second
attachment means 52 to a casing assembly 34 on the engine 20
wherein the second attachment means 52 is frangible.
